

Environmental·Energy Management Policy

HD Hyundai Marine Solution Co., Ltd. recognizes the environment and energy as core to sustainable growth and commits to implementing the following actions to promote eco-friendly growth, environmental protection, and energy conservation for all employees and stakeholders.

1. Environment·Energy Integrated System

Integrate ISO 14001&ISO 50001 into a single management system to streamline impact and energy management, internal audits, and corrective actions. This reduces gaps in audit requirements and helps prevent compliance risks.

2. Energy Efficiency to Reduce Scope 1·2

Conduct regular reviews of energy use to identify and implement saving initiatives. Link the outcomes to measurable and verifiable reductions in Scope 1 and Scope 2 emissions.

3. Transparent Disclosure to Build Trust

Respond to ESG data requests through a single point of contact using standardized templates for fast and consistent communication. Regularly disclose environmental and energy performance and improvement actions to strengthen trust.
