

Environmental & Energy Management Declaration

We are committed to sustainable green growth through low-carbon, eco-friendly management.

With the participation of all employees, we pledge to continuously improve our environmental and energy performance by fulfilling the following **Seven Commitments**—to leave a cleaner, brighter future for the next generation.

[Seven Commitments for a Brighter Future]

1. To achieve carbon neutrality, we will actively address the climate crisis by improving energy efficiency, switching fuels, and expanding the use of renewable energy.
2. We will drive green growth and improve energy performance through the development and innovation of eco-friendly technologies.
3. We will comply with applicable domestic and international environmental and energy laws, regulations, and global standards.
4. We will strengthen our environmental and energy management systems based on ISO 14001 and ISO 50001.
5. We will lead the way in efficient energy use through energy saving, reuse, and recycling.
6. Across all business activities, we will minimize environmental pollutants and greenhouse gas emissions and reduce energy waste through best available technologies and effective management.
7. We will ensure transparent disclosure and management of environmental and energy information to foster a clean and responsible management culture.
